REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: None of the references cited either alone or in combination provide a partition having a recess and having partition holes; a membrane located in the recess in the partition sized so that it covers the holes in the partition; a pressure disk which has pressure disk holes located in the area of the partition holes; the pressure disk being movable from an open position to a closed position; where in the closed position, the pressure disk releases the membrane so that the membrane may move, and in the open position, the pressure disk secures the membrane so that the membrane may not move; and further including the other limitations of the independent claims. Hettler et al, Lee et al, Kojima, Hein et al, Mellon, Matsuda et al, Tajima et al, Yamazoe et al, Klein et al, Quast, and LaBeau et al all lack an apparatus where a membrane is located in the recess in the partition, sized so that it covers the holes in the partition; a pressure disk which has pressure disk holes located in the area of the partition holes, the pressure disk being movable from an open position to a closed position; where in the closed position, the pressure disk releases the membrane so that the membrane may move.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
